Refresh yourself with a perfectly chilled bottle or can...

...from the impressive BevMax 3!

## Taking Cold Drinks Vending to the *BevMax*!

The impressive BevMax 2 has been enhanced to provide even greater reliability and performance - welcome to the **BevMax3**!

The large, illuminated glass front of the BevMax 3 provides consumers with a clear, unobstructed view of all products available, allowing maximum sales impact.

The motorised X-Y delivery system has been improved, collecting and delivering the chosen vend smoothly and quickly with little or no agitation,

before retracting out of sight in the door. A new 'fail-safe' ramp design (below) covers the lower conveyor belt to encourage dropped bottles to fall into a recessed area, ensuring vending operation is uninterrupted.

The BevMax 3 is available in its standard black livery, shown right, and also styled to complement other CMS equipment, offering customers a consistent bank of vending solutions from hot beverages and cold drinks to snacks and food machines.

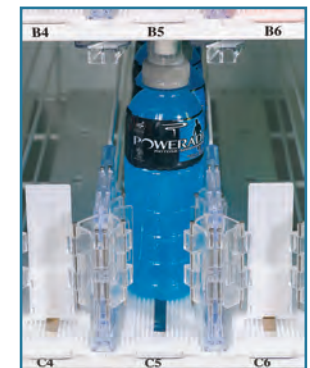

### Product Trays and Capacity

- Standard capacity, 5 trays with 45 product selections and 9 selections per tray
- Up to 495 product capacity
- Tall product pushers reduce the risk of product tipping
- Trays are adjustable and free of wiring harnesses, motors or solenoids, ensuring reliable operation

### Dual Gate Vend System

- Dual delivery gates provide a truly shimless vending system
- Allows bottles and cans of different sizes and shapes to be loaded and vended without adjusting the set up
- Simple yet accurate mechanism ensures positive product vend every time
- Product slides smoothly from the tray into the delivery cup for fast, reliable delivery

## Fast, Smooth Product Delivery System

The BevMax 3 features a fast and accurate X-Y product delivery mechanism which is able to vend virtually any permutation of cans, PET and glass bottles. With a market leading customer selection to product delivery time, the BevMax 3 provides the perfect solution for busy vend areas.

The revised delivery cup (left) smoothly retrieves each vended product and places it into the secure delivery port with little or no agitation. The system provides total control throughout the vend cycle, eliminating the possibility of product tipping from the tray during or after the vend. Between

vends the delivery mechanism retracts out of sight in the bottom of the door providing customers with an unobstructed view of all available products.

The rotating delivery hopper (right) illuminates and opens automatically when a product is dispensed, providing a convenient and customer-friendly product retrieval experience. The delivery port is also vandal resistant, preventing pilfering from the cabinet.

## Why choose BevMax 3?

- Fast and accurate X-Y delivery system picks and delivers product smoothly with little or no agitation
- 'Fail-safe' ramp design encourages dropped bottles to fall into a recessed area ensuring uninterrupted operation
- Door opens 90° flush, allowing BevMax 3 to be positioned next to a wall or in a bank of machines
- Dual delivery gates provide a truly "shimless" vending system, allowing multiple size products to be vended
- New plastic moulded coin chutes reduce coin jam issues
- Operator friendly. Quick and easy to load. No heavy trays to pull out!
